RESEARCH INTERESTS

I am interested in the field of **Human–AI Interaction**, with a focus on designing interactive systems that enable users to understand and steer AI behavior. In particular, I study how users engage in sensemaking and evaluation of large volumes of data (e.g., AI-generated responses, codes) to identify issues and provide meaningful feedback. My Master's work is more focusing on understanding and leveraging multi-agent systems. Ultimately, my goal is to build systems that effectively incorporate user intent across the *sensemaking–evaluation–feedback process*.

EDUCATION

Korea Advanced Institute of Science & Technology (KAIST) , Daejeon, South Korea Master's Student in School of Computing <i>Co-advised by Joseph Seering and Juho Kim</i>	Feb 2025 — Present
Korea Advanced Institute of Science & Technology (KAIST) , Daejeon, South Korea B.S. in School of Computing Minor in Civil & Environmental Engineering	Feb 2018 — Feb 2025
Nanyang Technological University , Singapore, Singapore Exchange Student (Coursework & Undergraduate Research Track) <i>Advised by Chei Sian Lee</i>	Jan 2024 — May 2024 [W1]

WORK EXPERIENCE

KAIST Interaction Lab (KIXLAB) <i>Undergraduate Research Intern (Mentors: Tae Soo Kim, Yoonjoo Lee)</i> Have been working on Evaligner project	Daejeon, South Korea Jun 2024 — Feb 2025 [W2]
Selectstar Inc. <i>Frontend Developer</i> Three years of full-time experience in frontend engineering. Participated in the iOS, Web project 'Cashmission', 'Cashmission: Spike', and 'Momojam'	Seoul, South Korea Dec 2020 — Dec 2023
