RESEARCH INTERESTS

I am interested in **Human-AI Interaction** and **Human-centered AI**, with a focus on **dynamic alignment** between humans and AI agents—how users communicate evolving goals and context to agents, and how they evaluate and refine agent behavior in return. I build interactive systems and AI methods for this from two complementary directions: (1) helping people understand, evaluate, and provide actionable feedback on AI behavior, and (2) enabling agents to better interpret users' evolving intent and context.

RESEARCH EXPERIENCE

Collaborative Social Technologies Lab (CSTL KAIST)

Daejeon, South Korea

Research Assistant (PI: Joseph Seering)

Feb 2025 – Present

- Led two grant-funded research projects: (1) constructed an in-the-wild, longitudinal multi-party dialogue dataset, TIDES, for training and evaluating AI models' ability to capture team dynamics [C2], (2) lead the development of a human-in-the-loop system for extracting and formalizing organizational workflows from unstructured work data (industry collaboration).
- Contributed to eight grant proposals, three of which were funded.

KAIST Interaction Lab (KIXLAB)

Daejeon, South Korea

Undergraduate Research Intern (Mentors: Tae Soo Kim, Yoonjoo Lee, PI: Juho Kim)

Jun 2024 – Feb 2025

- Developed EVALIGNER [W2], an interactive system for refining LLM evaluation criteria and prompts from user feedback.

PROFESSIONAL EXPERIENCE

Selectstar Inc.

Seoul, South Korea

Frontend Developer

Dec 2020 – Dec 2023

- **Three years of full-time frontend engineering experience.** Implemented production iOS, Web applications: Crowdsourcing platforms for collecting AI training data.

TEACHING

KAIST CS473 <Multi-Agent Engineering for Social Computing>

2026 Fall

Head Teaching Assistant (Instructor: Joseph Seering, 28 students)
